

TRAILED FERTILIZER SPREADER

Product Details

Trailed Fertilizer Spreader

Fertilizer spreader is a modern granule fertilising machine which is manufactured as trailed type with two discs, hydraulic control and PTO shaft. The fertilizer spreaders are easily transported to the field where fertilizing shall take place, and there is no need to take a second tractor to the small fields thanks to our machines with a high storage capacity. The fertilizer spreaders can be manufactured with hydraulic controls. Thanks to the hydraulic control, fertilizer flow can be easily controlled at the boundaries of the field from the tractor cab. Also, it is possible to individually control the fertilizer spreading discs at the boundaries thanks to the hydraulic control. Depending on the type of fertilizer, the settings of angle and wing length on the disc must be changed.

Technical Features	Units	Models	
		AFS-T2500	AFS-T3500
Number of Discs	pcs	2	2
Hopper Capacity	lt.	2500	3500
Total Width	cm	215	215
Working Width	m	24-36	24-36
Total Length	cm	265	290
Total Height	cm	220	245
Weight	kg	750	900
Tractor Power	hp	70-90	70-90
PTO	rpm	540	540
Stainless Steel Disc & Wings		Standard	Standard
2-way Auto Control		Standard	Standard
Fertilizer Adjust Sys.		Hydraulic	Hydraulic

OPTIONAL EQUIPMENTS

Double Axle (4 tire)
